Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-9 rejected under 35 U.S.C. 102(B) as being clearly anticipated by Nanbu et al.(U.S.Pat.6,414,277).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nanbu in view of Berg(U.S.Pat.5,313,048). Nanbu discloses an ultrahigh temperature heat treatment apparatus that shows many of the features of the claimed invention but fails to explicitly show a silica and aluminum block. Berg discloses a high temperature research furnace with a v-shaped guide member that shows a silica and aluminum block. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a silica and aluminum block as taught by Berg in the device of Nandu to create a refractory block.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-6 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nandu in view of Lecouras et al.(U.S.Pat.5,900,177).). Nambu discloses an ultrahigh temperature heat treatment apparatus that shows many of the features of the claimed invention but fails to explicitly show a semiconductor fabrication method. Lecouras discloses a furnace sidewall temperature control system that shows using a furnace to fabricate semiconductors. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a furnace to fabricate a semiconductor since the temperature can be controlled.

Allowable Subject Matter

Claims 10-13 and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3742

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. HirasawaUS 5,001,327 and Futamura US 6,372,048 are cited to show structure similar to the claimed invention.
